- ☐ A. Diabetes is no longer a problem for adults.
- ☐ B. Children don't suffer from diabetes.
- ☒ C. Diabetes can affect both adults and children.
- ☐ D. Previously, diabetes didn't affect children.

2. Although kabaddi is an older and more beloved game, kabaddi players never caught the attention of Hindi filmmakers the way cricketers did. **Which of the following options can definitely be inferred from the given information?** (1 Point)

- ☒ A. There have been more Hindi films about cricketers than about kabaddi players.
- ☐ B. Films about kabaddi players were popular before films about cricketers.
- ☐ C. Cricketers are usually more popular than kabaddi players.
- ☐ D. Hindi movies on cricketers have been bigger hits than those about kabaddi players.

3. When paddy farmers talk about new varieties of paddy, they don't mean something developed last month, last year, or even in the last decade. **Which of the following options can definitely be inferred from the given information?** (1 Point)

- ☐ A. Paddy farmers haven't developed any new varieties in recent decades.
- ☐ B. Some varieties of paddy can be developed in a short time, but others take a long time.

☒ C. New varieties of paddy take many years to develop.

☐ D. Paddy farmers are not always eager to start cultivating new varieties of paddy.

4. In all cultures, nods are used as a form of communication, but the same type of nod may have very different meanings in different cultures. **Which of the following options can definitely be inferred from the given information?** (1 Point)

☐ A. No two cultures use the same type of nod.

☐ B. One type of nod will never have the same meaning in two cultures.

☒ C. A person from one culture may misunderstand the nods used by a person from another culture.

☐ D. Nods, as a form of communication, are more effective in conveying the desired message in some cultures than they are in other cultures.
